

I am appalled that Sinclair Broadcasting is not being stopped by the FCC from airing an anti-Kerry propaganda piece so near an important presidential election. This lack of action by the FCC clearly shows the danger of media consolidation. The airways are owned by the public and should be used to promote the public good. A propaganda piece has no place. The FCC owes it to the citizenry to stop this from happening in our democracy.

We definitely need to strengthen ownership rules so that the media serves the public interest and not that of a media corporation interested in profits and promoting a particular point of view. Thank you.
